Register TunePat VideoGo All-In-One

Step 1: Run TunePat VideoGo All-In-One on Windows PC or Mac, click the **"Menu"** button at the upper right corner of the interface and choose **"Register"** in the drop-down menu. Or you can directly click on key icon to open the registration window.

Step2: Copy and paste the **registration email** and **code** you received into the registration popup window, then click **"Register"** button.

Step3: Once finished the registration process, the limitations of the trial version will be removed.

Tutorial of TunePat VideoGo All-In-One

Tips:

1. Make sure your computer is well-connected with the Internet.
2. We suggest you should just copy & paste the registration information into the popup dialog.
3. Make sure both registration email and registration key are provided by our company after purchasing. If you have not paid, please click "**Buy Now**" to get a license.
4. Please make sure registration email and registration key you entered are both complete and correct, otherwise an error message will pop up as below:

The image shows a registration popup dialog box with a green header bar labeled "Registration" and a close button (X) in the top right corner. The main content area has a light gray background and contains the following elements:

- A prompt: "Please enter your new license, [or buy a new one.](#)"
- An "E-Mail:" label next to a text input field containing a blurred email address.
- A "Code:" label next to a text input field containing a blurred registration code.
- A red error message: "The registration information must be entered exactly as they appear in your confirmation email. Using the copy and paste method to enter the license is recommended."
- Two buttons at the bottom: a green "Confirm" button and a white "Cancel" button with a green border.

Installation & Interface

Select the Website

After downloading the TunePat VideoGo All-In-One from the official website, run it on your Windows PC or Mac. Then, choose the site from which you wish to download videos. TunePat will automatically open the web browser after you select it.

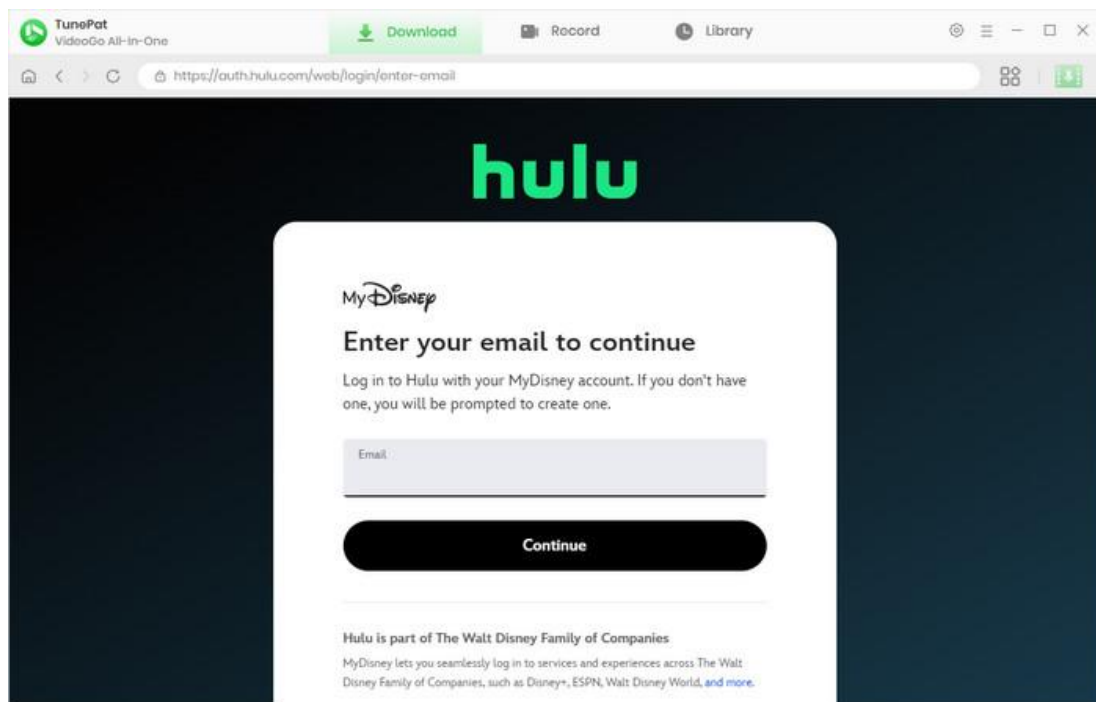

Tutorial of TunePat VideoGo All-In-One

Log into Account

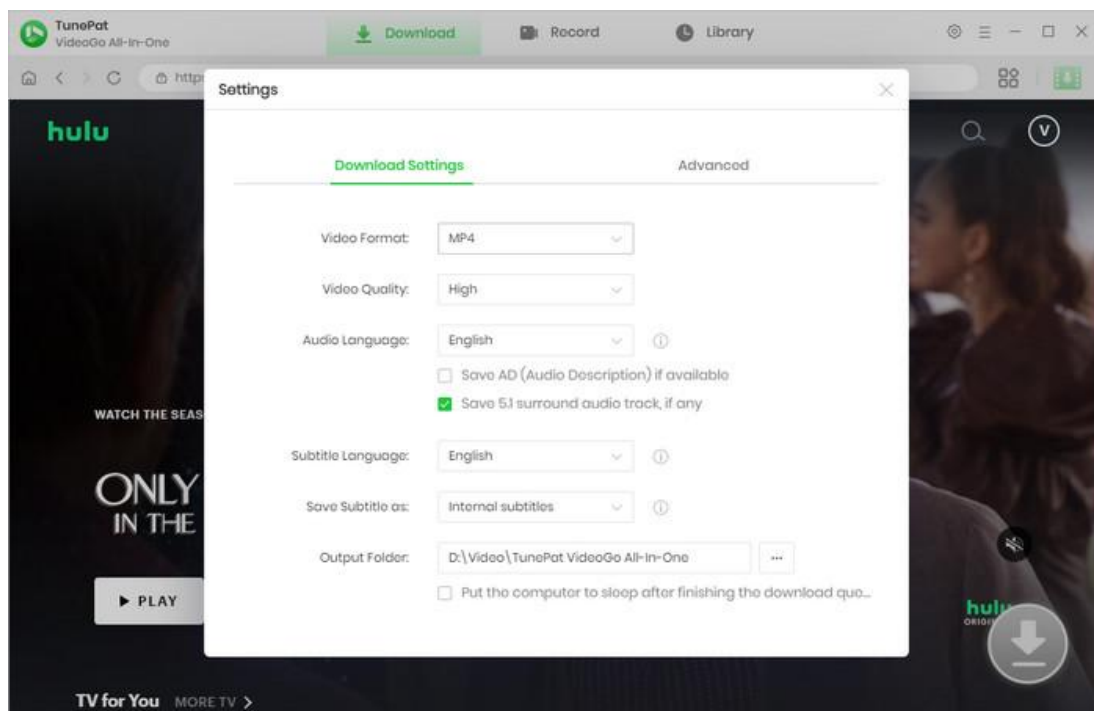

You are then required to log into your account in the built-in web player. Simply follow the tips. Please note that you only need to log in to your account when downloading videos from streaming service. If you are downloading from social media platforms, please ignore this step.

Customize the Output Settings

You can set up the output settings of the video by clicking the **"Settings"** button in the upper right corner. You can choose the video format (MP4 or MKV), video quality (Low, Medium, and High), the language of the audio track and subtitle, the output path, and more.

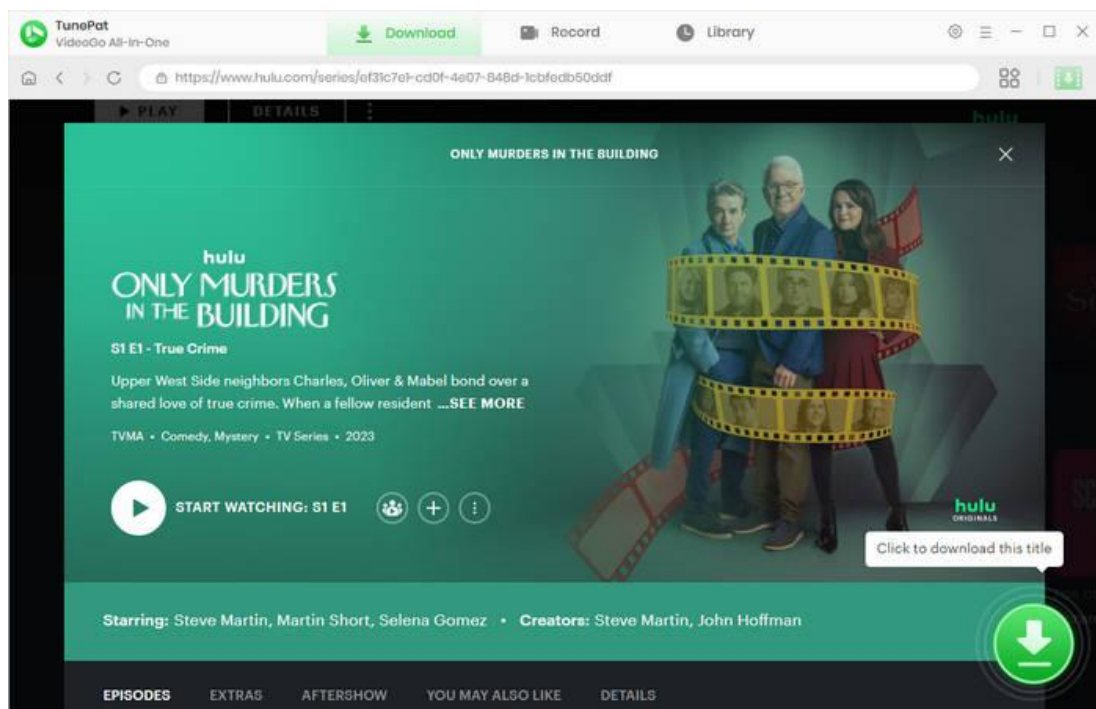

Tutorial of TunePat VideoGo All-In-One

Search for the Video

Search for your wanted video by browsing the web player or using the search feature of the platform. Open the video and click on the green downward arrow named **“Click to download this title”** to let TunePat load the related video on a popup.

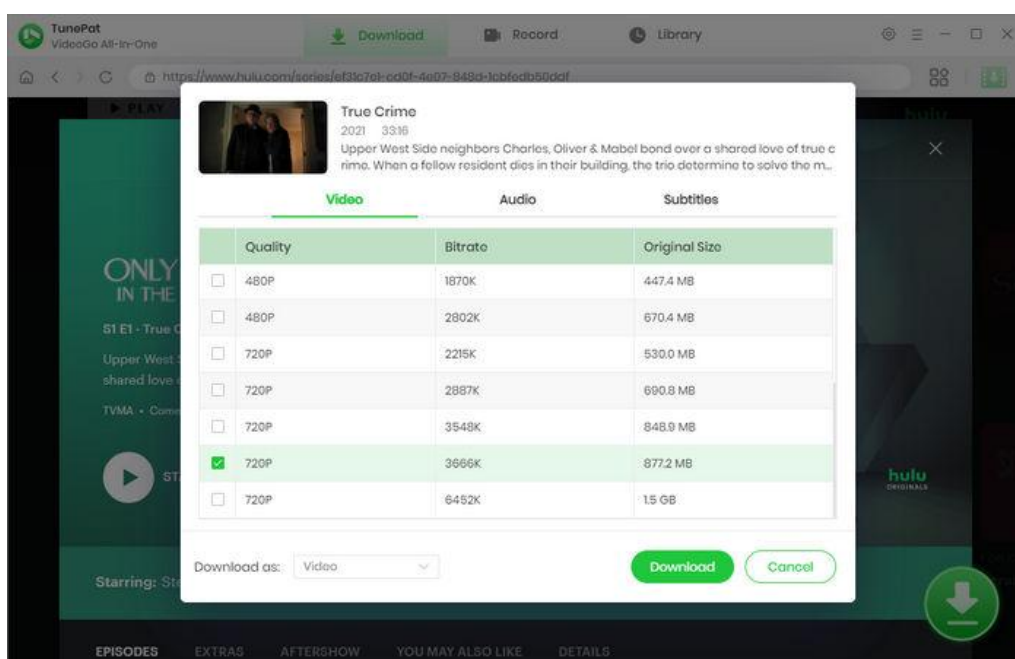

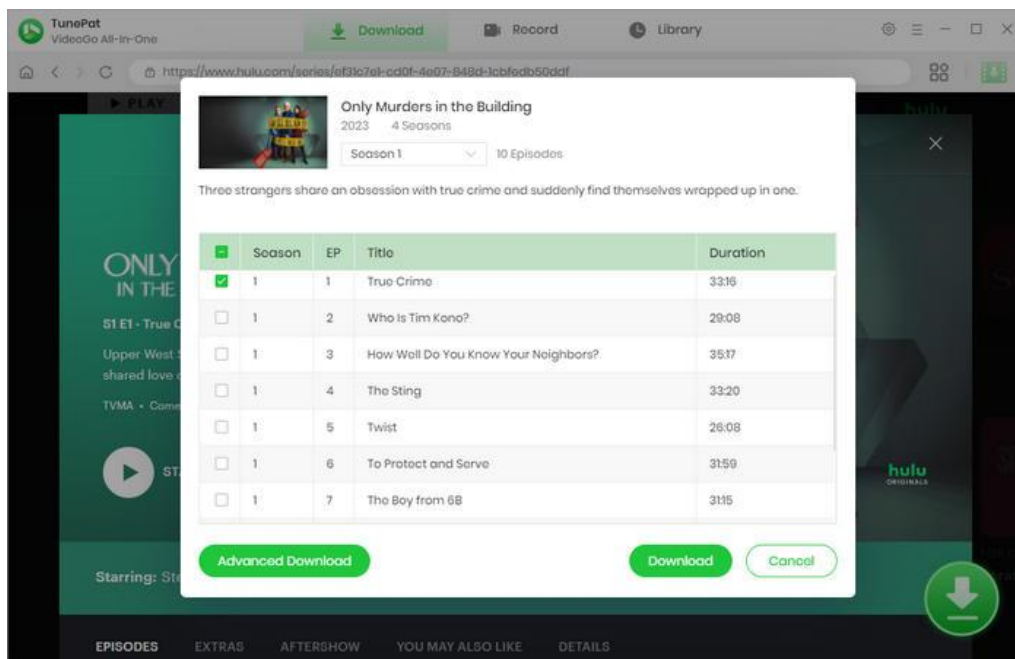

Choose the Advanced Download Settings

TunePat offers advanced download options to let you choose specific parameter for the video. You can choose your preferred video quality depending on your preferences or device storage, as well as audio tracks and subtitles. It is also worth noting that this feature is also only available for downloading videos from streaming media.

In addition, if you are downloading a TV show, you need to select a season and wanted episode first, and then click on the **“Advanced Download”** button.

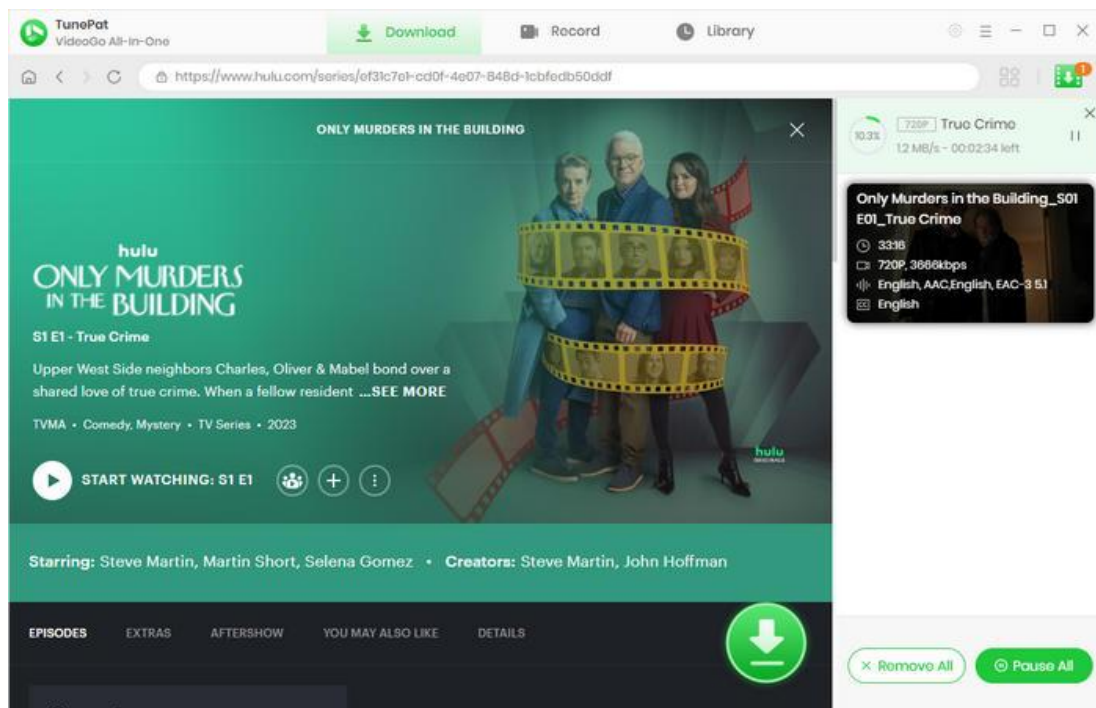

Tutorial of TunePat VideoGo All-In-One

Download the Video

After the above setting, you can begin to download the video by clicking the **"Download"** button. A window will pop up on the right side of the software where you can see the downloading video as well as the internet speed and download progress.

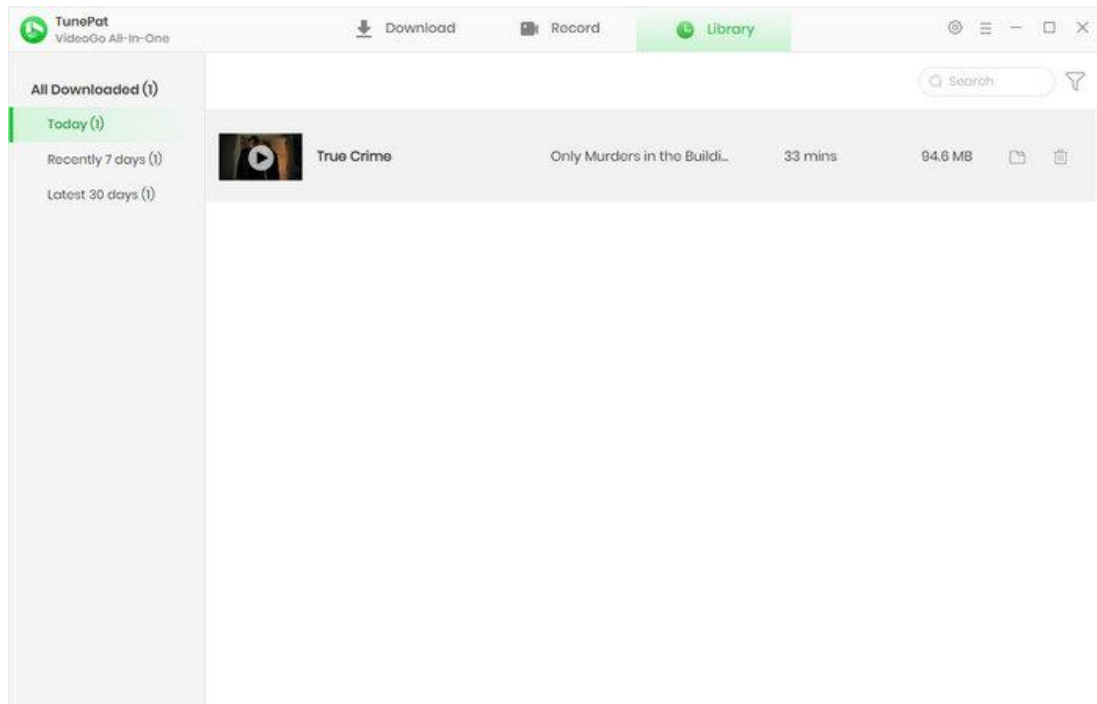

If you want to download more videos, add the desired videos to this task list by repeating the previous adding action. TunePat will automatically start a new download once the current task is finished.

Check Download History

When finished, click **“Library”** and you can find the downloaded video and the history of downloading.
